FERRODONA 50ML

Ferrodona – For Anemia and prevention of iron deficiency

Anemia, or the lack of red blood cells, can result from severe blood loss, iron deficiency, degenerative dysfunction caused by chronic infections, or toxins that enter the bloodstream from acute infectious illnesses. These processes impact the entire energy of the body, which independent upon the efficiency and capacity of the erythrocytes. **FERRODONA** drops provide the body with high quality iron, help ensure the blood is supplied with essential minerals and rejuvenate the organs that furnish the body with blood. This preparation is especially important following childbirth, accidents that involve considerable loss of blood and treatment of acute or chronic illnesses.

Recommended Dosage: Adults 15-20 drops 2X per day directly or in water
Children 7-10 drops 2X per day directly or in water.
