

MUNDIPUR

Mundipur is used for general drainage and excretion of toxins where inflammation is present. This is a great remedy to treat an inflamed state anywhere in the body. Because the toxins mobilized by **Mundipur** tend to exit through the bowel, it will tend to increase function of a sluggish bowel, even though it is not a laxative.

Recommended dose: 1 teaspoon 3-4x/day

Ingredients: Berberis vulgaris spag. Pekana 6X,
