Calendula Ø	0.02 g
Mercurius bijodatus Tri. 5X	0.001 g
Stibium sulfuratum nigrum Trit. 1X	0.001 g

Product information:

Proper lymphatic drainage is essential for optimum immune function, detoxification, recovery from injury, reduction of inflammation and tissue drainage.

The lymphatic system is a complex and relatively fragile system which acts as a sewage system for the body, removing excess fluid, toxins, inflammatory mediators and other wastes. In addition, it is of vital importance in the transport of immune cells and fighting infection.

Sluggish lymphatic flow can be a result of a wide variety of factors, including physical disruption (as in trauma or surgery), chronic inflammation, disease, toxic accumulation, and inactivity.

LYMPHDIARAL® Drops and Drainage-Cream have a long history of successful use in the treatment of conditions involving the lymphatic system. Several clinical trials have proven their effectiveness in the treatment of edema, infection, and injury.

In a study of 394 cases of acute illness, LYPHDIARAL® Drops were shown to have good or very good efficacy in the overwhelming majority of cases. A separate study examining the effectiveness of LYPHDIARAL® in children with tonsillitis also found significant improvement through application of the cream directly to the tonsillar area as well as taking the drops orally.

In a large surveillance study using LYPHDIARAL® Drainage-Cream and Drops in the treatment of various lymphatic conditions, LYPHDIARAL® resulted in significant improvement on swelling, pain, inflammation, erythema and fever. Patients were suffering from a variety of lymphatic complaints, including lymph node swelling, radiation-dependent lymphatic congestion, and post-operative edema.

LYMPHDIARAL® has also been proven to have a beneficial effect on sports injuries, including bruising, sprains, and trauma. Patients had significant improvement of pain, swelling, and restriction of movement.

And since the lymphatic system is an essential route for elimination of toxins, LYPHDIARAL® Drops are a key component for any detoxification protocol, providing support not only for the lymphatic system but also other organs of detoxification such as the liver, kidney and intestinal tract.

A survey of Canadian naturopathic doctors found that LYPHDIARAL® was being used for edema, inflammation, detoxification, pain, infection, acute trauma and cellulite, among other conditions. All users found that their patients rated satisfaction with LYPHDIARAL® as good or very good. No negative feedback was received.

LYMPHDIARAL® Drops and Drainage-Cream should be considered as part of any protocol which seeks to address inflammation, infection or swelling.
